

Pollution Map was made for particulate matter suspensions from measurements carried out with air particle counter P311 during September. For each point on the map, three measurements were performed with an interval of one week between them, in size ranges PM0.3, PM2.5 and PM5.

1. Measurement points, function of local geographic coordinates

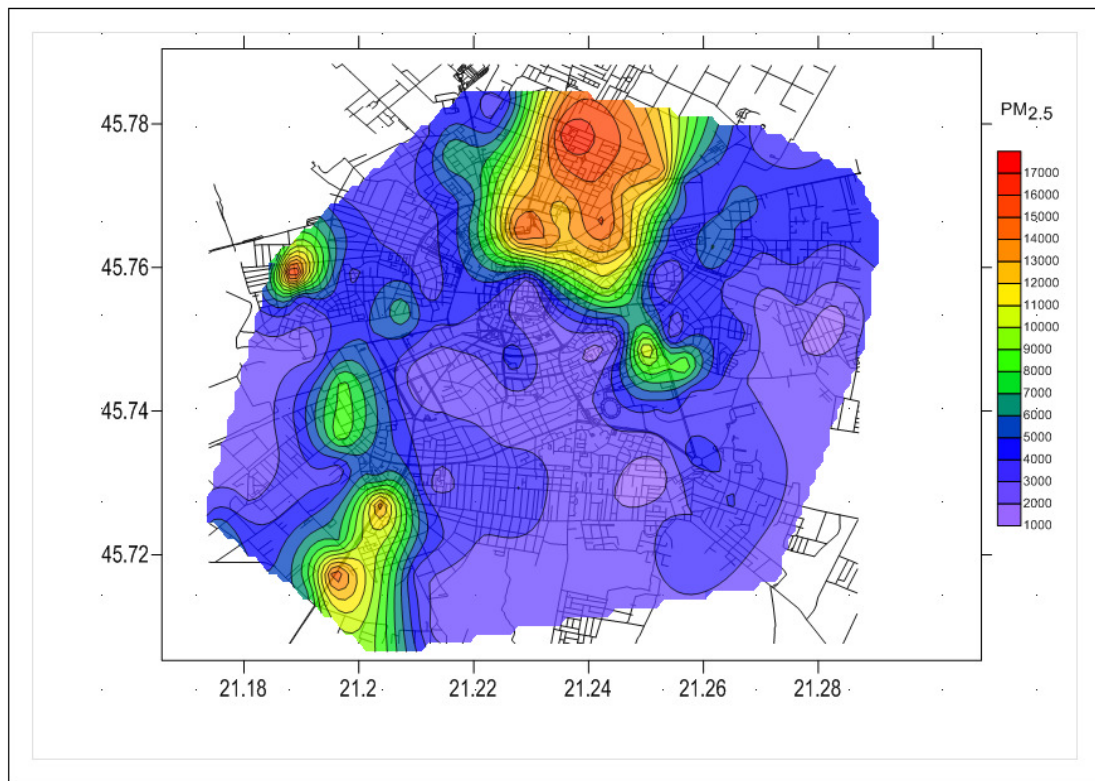

2. Pollution map of Timisoara city for particulate matter suspensions of 300 nm.

On the axes are placed the local geographic coordinates

3. Pollution map of Timisoara city for particulate matter suspensions of 2.5 μm .

4. Pollution map of Timisoara city for particulate matter suspensions of 5 μm .
